made in the USA

- Emergency power arm release
- Two easy weight capacity adjustment settings in one lift
- Battery powered with internal charger
- 750 lb. and 1000 lb. weight capacity

FEATURES

ARM STYLE

The Lift & Transfer by Wheelchairs of Kansas is the traditional style, portable lift constructed of heavy-duty steel. The easy rolling swivel casters, two in the back and four in the front, allows for positioning into various locations. The base has an automatic width adjustability for added stability. The lift is operated by a four-button hand control and a linear driven actuator that is virtually silent. For added safety, the emergency release allows the individual to be lowered when battery power is interrupted.

Five year warranty on structure.
One year on all other components.

SPECS

*Lift height (from the clevis pin to floor) 34"-75"
