FEATURES

OVERLANDER PEV

The **Overlander PEV** from Wheelchairs of Kansas offers dynamic performance for the bariatric individual. It meets the mobility needs of the user with rugged tires, a durable steel frame for strength and the power of two 4-pole motors. The suspension is adjustable, allowing for fine-tuning by the individual rider. The gear belt drive system and 4-ply tires create a virtually all terrain powerchair.

AVAILABLE OPTIONS

Seating systems- width: 18"-28" (2" increments) • depth: 18"-24" (2" increments) • PEV elevating legrest • **More options available**
